

Polycarbonate Lenses – Provide comfort and safety

Polycarbonate lenses keep your eyes protected while providing clarity, cleanliness and strength. Polycarbonate lenses give you peace of mind with multiple benefits that provide you the comfort and protection you need.

- ❑ Thinner than plastic lenses
- ❑ Exceptionally lightweight
- ❑ Superior impact resistance
- ❑ UVA and UVB protection
- ❑ Ideal for adults and children in any lifestyle situation

Anti-Reflective Treatment – Look, see, and feel better

Enjoy a more comfortable and better-looking pair of glasses with anti-reflective lenses. You will experience improved night vision by the reduction of reflection and glare, plus increased cleanability and scratch resistance. Anti-reflective lenses can also reduce eyestrain and irritation, and improve eye health.

- ❑ Easy to clean and scratch-resistant
- ❑ Reduce eye strain from computers
- ❑ Dramatically limit unwanted reflections
- ❑ Reduce glare and reflections to improve lens aesthetics
- ❑ Protection from harmful UV and blue-violet light available on selected lenses

Progressive Lenses – A modern look

Unlike traditional bifocals that only offer two working distances – far and near – progressive lenses give you more natural vision and a smooth transition from far to intermediate and near vision. Enjoy a more natural experience with no image jump and a more youthful look.

- ❑ Uninterrupted vision with less eye strain
- ❑ Stylish, youthful look
- ❑ Less head tilting than traditional bifocals
- ❑ Additional intermediate zone perfect for viewing computers, phones, and menus

Digital Single Vision Lenses – Real world vision

Benefit from a crisper, more vivid visual experience by enhancing your single vision design with digitally processed lenses! Experience your design with precision and sharpness in every light condition with a broad field of vision and vibrant color.

- ❑ More vivid colors and details
- ❑ Exceptional clarity in low light
- ❑ Sharp vision across the lens
- ❑ Reduced distortions

Photochromic Lenses – Comfort in every light

Using the very latest technology, today's photochromic lenses are the convenient, everyday solution that offers light protection by adjusting the level of tint when inside and outside. You will enjoy a seamless experience as the lenses transition from clear indoors to dark outside and back to clear indoors very quickly, all with UV protection!

- ❑ More comfortable inside and out
- ❑ Easily transition from low light to bright light
- ❑ Provide protection from UV rays
- ❑ Reduced glare

Polarized Sun Lenses – Vibrant color, exceptional protection

Polarized lenses provide you enhanced contrast and glare reduction you deserve outdoors. Enjoy vibrant colors, sharper detail, and crisp, pure vision all with UV protection. Polarized lenses are available in several color choices.

- ❑ Fight harsh, blinding glare
- ❑ Provide protection against UV rays
- ❑ Enhance contrast sensitivity
- ❑ Enriched color and sharpness
